

# SUBZERO AESTHETIC

A simple, fast and safe treatment option for health and beauty

- Wrinkle reduction
- Anti-inflammatory
- Antioxidant effect
- Fat reduction

Subzero is one of the most effective cryotherapy solutions for your aesthetic needs. It enables you to treat multiple areas of the body safely and in a very short time, improving active skin conditions while also preventing skin aging and reducing fat - all while using your body's own natural healing processes to amazing effect!

## How it Works

The subzero cryotherapy machine uses pressurized CO2 gas to target a local area of the body and cause "thermal shock." This is where the benefits of subzero cryotherapy can really start to take effect. It removes toxins from the skin, promotes the growth of healthy and natural collagen fibers, contours and reduces fat through Cryolipolysis, puts the stretch back in skin, and even reduces puffiness in the face. Thermal shock has amazing benefits for the body. You'll be amazed at what only 5 minutes can do for your skin and overall health!

Competitively priced cryotherapy device developed for Med spa

High quality, ergonomic and practical use

Used by Aestheticians, med spa and Massage Therapists

Suitable for whole and partial body treatments

Instructional videos, treatment protocols remote training available

Truly a no brainer. Our clients love it, it's a great source of revenue, and it's ridiculously easy to use!

# Your Effective, Gentle Beauty Solution

## ■ Wrinkle reduction

Cold temperatures can relax the muscles of the face, helping to do the job of injections for wrinkle reduction without any injecting.

## ■ Anti-Inflammatory

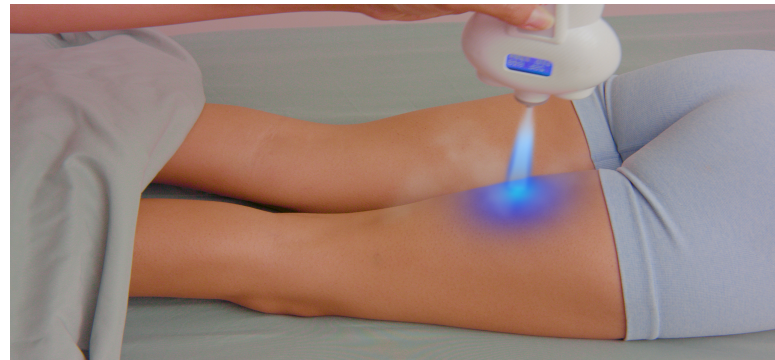

Cryotherapy reduces inflammation through skin cooling and clearing of toxins in the blood. Continued treatment can boost the immune response to fight acne-causing bacteria. Cold treatment can also locally decrease itchiness or feeling heat from inflammation.

## ■ Antioxidant effect

Cryotherapy, through the changes it causes to the body's blood flow, can help promote the delivery of antioxidants and other healing materials to the skin treated to prevent skin aging.

## ■ Fat reduction

Cryotherapy is a perfect tool for body sculpting and fat reduction by safely and preferentially targeting fat cells. Through the use of cold treatment, Cryolipolysis (commonly referred to as fat freezing) is achieved and helps to reduce localized fat deposits or bulges that do not respond to diet and exercise.

## WHAT IT TREATS

### ■ SIGNS OF AGING

- Wrinkle reduction
- Eye bag reduction
- Prevents further skin aging

### ■ BODY SCULPTING

- Contouring
- Fat reduction
- Skin toning

### ■ INFLAMMATION AND PAIN

- General analgesia
- Acne
- Atopic dermatitis
- Psoriasis
- Eczema
